ASSET MANAGEMENT JUST GOT SMARTER

# TRACKIT | PRO

## EMPOWERING YOU TO MAKE INTELLIGENT ASSET DECISIONS

At TRACKIT we've earned our stripes providing complete visibility of IT assets for some of the biggest companies in the world and demonstrated the importance and value of having an accurate view of their asset data.

We've taken this insight and applied our expertise to create a new cloud based asset management solution for Enterprise businesses – TRACKIT PRO. This innovative solution allows you to manage any type of business asset on one intuitive platform, starting with property and estate management through to a limitless ability to track ALL your businesses physical assets, across locations, inside and even outside your buildings. Track any asset no matter how big or small including details of asset hierarchy (assets within assets). From laptops and office furniture to data centres or warehouses the size of shopping centres – now your assets have nowhere to hide.

Quite simply TRACKIT PRO will empower you with the visibility and insight you need to make more intelligent strategic decisions to more effectively manage the entire life-cycle of your assets and increase return on investment.

*"...for the first time we have had the complete picture and the knowledge to confidently make the right decisions about what we do and where we do it. Changes can now be easily reported against with known and predictable outcomes."*

*Operations Manager for a leading communications services provider*

# TRACKIT | PRO

## KEY BENEFITS – MAP. TRACK. CONTROL.

TRACKIT PRO gives you the ability to map, track and control all of your physical business assets no matter where they are located across multiple locations. With TRACKIT PRO managing your business assets has never been easier.

### SMARTER

Replace outdated and inaccurate methods like local spreadsheets/databases with our intuitive, web-based secure multi-user platform.

### FLEXIBILITY

A choice of cloud or hosted application. Flexibility to adapt with your business, completely scalable, one solution but multiple applications and bespoke pricing based on your requirements.

### FAST IMPLEMENTATION

Quick to implement, fully automated set-up with helpful "Wizards". 100% browser-based, no need to install and manage local software clients.

### EASY TO USE

Simple cross platform interface with fully responsive design. iOS and android mobile apps for searching and managing assets. Drag and drop floor and building plans instantly, import and update asset inventory quickly and easily, maintain asset information seamlessly for complete accuracy. Multi-lingual support out of the box.

### COMPLETE VISIBILITY

View your assets in an instant, full audit trails / workflows, intelligent fully customisable reporting and dashboards, monitoring alarms and threshold alerts providing insight and integration with many different systems (incl. your BMS).

### COMPLETE CONTROL

Track movement of all assets, asset history and easily append purchase, warranty, value and ownership information. Precise location and real time asset collection / updates.

### SEAMLESS INTEGRATION

Open API with ability to fully integrate with multiple IT, facilities and enterprise software and monitoring solutions or your CMDB, BMS or existing legacy asset management systems.

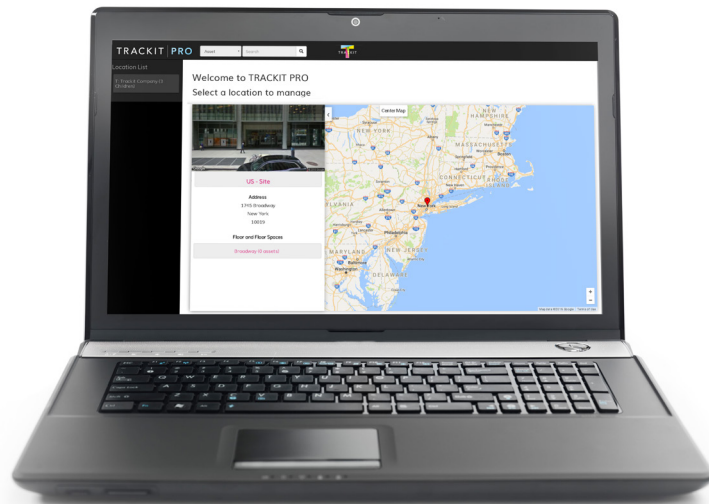

### PEACE OF MIND

Secure platform with the ability to control and set levels of access to individuals or groups. Full on line service and support with expertise on hand when and if you need it.
